

Online

The Baptist Health South Florida CME Department

Online Learning Program appreciates the opportunity to be able to provide the ***Prescribing Controlled Substances*** course to Palm Beach County physicians.

As we work in the coming weeks to create this online course – which will be available to all Florida physicians at no charge – we ask that interested learners sign-in to their existing account and update their Baptist Health CME Portal profile and that new learners create an account to familiarize themselves with course navigation. We currently offer nearly 150 online courses, including relicensure requirements, on the Baptist Health CME Portal.

[Frequently Asked Questions](#)

The direct URL to the Baptist Health CME Portal is CMEOnline.BaptistHealth.net.

Physicians are advised to complete all required fields on their profile including Occupation, Profession and “I am licensed in the State of Florida...” to trigger automatic reporting to CE Broker and proper certificates. Transcripts and certificates are all self-service through the Baptist Health CME Portal upon successful course completion.

Please reach out with any additional questions or concerns.
